Feedback Subject

- Engineering: *irrigation, drains, pipelines, etc.*
- Land Use: *residences on property, planned development, etc.*
- Right-of-Way: *vegetation, tree lines, compatible uses, etc.*
- Environmental: *wildlife, threatened & endangered species, wetlands, floodplains*
- General Comment

Feedback Tips

- Please describe any features, uses, or conditions on your property or nearby that we should know about.
- Are there features on or near your property that might affect where the line could go (e.g., irrigation systems, trees, drainage, underground utilities, animal habitats, or access)?
- If the project would cross your property, what would be most important for us to consider in minimizing impacts or areas that you may prefer *not* to be disturbed?
- What would make construction or access easier for you?
- What would help minimize the impact to you or your operations?
- Do you know of any easements, past construction issues, or land conditions we should be aware of?

Specific Feedback: Complete on back (attach photos, copies of maps, etc. that will help us understand your concerns) →

Comments may be compiled and shared with the Michigan Public Service Commission (MPSC) as part of the project application process.
